Non-Final Office Action

Claims 1-11, 17, 18, 20, 22, 24, 26 and 28 are pending. No claim is allowed at this time.

Amendments are entered.

Summary of this Office Action dated December 06, 2006

1. Information Disclosure Statement
2. Copending Applications
3. Specification
4. Double Patenting rejection
5. Closest Prior art
6. Communication

Copending Applications

Applicants must bring to the attention of the examiner, or other Office official involved with the examination of a particular application, information within their knowledge as to other copending United States applications, which are "material to patentability" of the application in question. MPEP 2001.06(b). See *Dayco Products Inc. v. Total Containment Inc.*, 66 USPQ2d 1801 (CA FC 2003).

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting Rejection

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-11, 17, 18, 20, 22, 24, 26 and 28 provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11, 17, 18, 20, 22, 24, 26 and 28 of copending

Art Unit: 1616

Application No.10/821,479. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

3. Instant claims are drawn to 2-hydroxypropylidene 19-nor vitamin D 3 compounds and their composition, which has been claimed in the co-pending application 10/821,479.

Closest prior art

Closest prior art is DeLuca et al. US Patent 6,806,262, WO 01/92221 and EP 1,524, 264. These references do not teach 2-(3'-hydroxypropylidene-1alpha, 25-dihydroxy-19-nor vitamin D3 compounds as presently claimed.
